## **Introduction**

The data in this booklet is based on data from the 2022/2023 academic year including the School Census January 2023 and May 2023 and the birth data for 2021/2022 academic year from the Office for National Statistics (ONS). The pupil projections are the figures supplied to the Department for Education as part of the School Capacity Survey 2023 (SCAP23).

# Map of Sefton

Map showing the different areas of Sefton

## **Structure and Characteristics of School Provision**

At the beginning of the 2023 academic year there were 18 (11 to 16 and 11 to 18) secondary schools including 15 academies, 74 primary schools including 2 infant schools, 2 junior schools and 9 academies, 5 special schools and 3 nursery schools in Sefton. 50 primary and infant schools have nursery classes. There were 10 secondary schools with sixth forms.

**Table 1: School Provision in Sefton**

	Maintained	Voluntary Aided	Voluntary Controlled	Academy	Trust Foundation	Total
Nursery	3					3
Primary	29	31	5	9		74
Secondary		3		15		18
Special	4				1	5

The denominational sector is very strong in Sefton, particularly in the primary phase where community schools form 39% of the total, 34% of the schools are Catholic and 20% are Church of England. Nine (12%) of the primary schools are now academies; one of these is Catholic and three of these are Church of England (these are included in the denomination percentages above). In the Secondary phase, five of the eighteen (28%) high schools are Catholic schools and only one high school (6%) which is now an academy has Church of England status.

All except two of the 18 secondary schools in Sefton are co-educational. Two academies in Southport are single sex, one for boys and one for girls.

South Sefton Campus, which is part of Hugh Baird College, provides post-16 education for pupils in the Bootle and Litherland areas. The former 6<sup>th</sup> form college merged with Hugh Baird FE College on 1<sup>st</sup> December 2017. The remaining 11-18 schools are in the central area of the Borough apart from one in Southport. In Southport, the majority of sixth formers attend King George V sixth-form college which merged with Southport College on 1<sup>st</sup> December 2018 whilst provision is made for Catholic students at Christ the King High School.

There are two pupil referral units which provide education for excluded pupils and those at risk of exclusion. One provides for primary pupils (KS1-KS2) and the other secondary (KS3-KS4).

Pre-school provision is provided through a combination of nursery schools, nursery units in primary schools, private nurseries and playgroups and Family and Wellbeing Centres.

St Teresa's Catholic Infant & Nursery School closed on 31<sup>st</sup> August 2022.

Savio Salesian College became an academy (Salesian Academy of St John Bosco) on 1st January 2023.

Meols Cop High and Bedford Primary became an academy on 1<sup>st</sup> April 2023.

## **TRENDS IN PUPIL NUMBERS**

Each year, the Authority produces five-year forecasts for primary schools and seven-year forecasts for secondary schools based on information from a variety of sources. The figures for primary pupil numbers are for January whilst those for secondary are for September when numbers are at their highest.

## **Methodology Used for Forecasting Pupil Numbers**

Each year, following the completion of the January School Census Return which provides details of pupil numbers, projections of primary and secondary pupil numbers for the following years are updated.

The projections are based upon:

- the number of births in Sefton in the relevant year;
- pupil numbers based upon School Census in October and January
- trends in the pattern of admissions.

### **Primary Pupil Numbers**

Forecasts of primary pupil numbers are based upon actual and estimated birth data provided by the Office for National Statistics (ONS). Each year, the LEA receives details of the actual births, and all projections are updated accordingly. This however does not allow pupil numbers to be estimated for the whole of the planning period. Forecasts for these later years are based upon birth estimates provided by ONS and trends for each area.

The birth projections provided by ONS are updated every couple of years. The most recent projections available are the 2018 based figures. The most recent figures for actual births are for 2021/22 which are marginally higher than the 1996 based projections but lower than the 2004 based, 2010 based, 2012 based, 2014 based, 2016 based and only slightly lower than the 2018 based ONS projections. The complexity of the relationship is indicated by the figures in Table 2.

**Table 2: Actual and Projected Births in Sefton**

Year	Actual Births (calendar year)	ONS 1996 Based Projections	ONS 2004 Based Projections	ONS 2010 Based Projections	ONS 2012 Based Projections	ONS 2014 Based Projections	ONS 2016 Based Projections	ONS 2018 Based Projections

**Source: ONS**

The births by area, expressed as a percentage of Sefton births are illustrated in Table 4. There has been a 2.34% increase in births (59 children) overall across Sefton between 2020/2021 and 2021/2022 with the largest increase occurring in Formby (13.5 % increase). Births in Bootle, Litherland and Maghull have risen slightly; 3.5% (Bootle), 4.5 % (Litherland), Maghull (1.8%) Births in Southport have dropped slightly (1.0%).

**Table 4: Area Births as a Percentage of Sefton Births in 2021/2022**

<b>Area</b>	<b>% of Sefton Births</b>
Bootle	25.82
Litherland	10.49
Crosby	16.73
Formby	6.16
Maghull & Aintree	12.91

Area	% of Sefton Births
Southport	27.89
SEFTON	100.00

Overall reception pupil numbers are then determined by establishing the relationship between the number of pupils who entered reception classes in the last three years and the number of births in the appropriate preceding years and then applying the three-year average to the births data. For Sefton, this results in a slight reduction overall in the number of pupils for whom primary school places must be provided.

Table 5 shows the relationship between Births in 2018/19 and Intake into Reception Classes 2023/24. This illustrates that it is not evenly distributed across the different areas of the Borough.

**Table 5: Relationship between Births and Intake into Reception Classes, 2023/24 academic year**

Area	Reception Year Intake as % of Births in Appropriate Preceding Year
Bootle	19.79
Litherland	11.32
Crosby	20.25
Formby	9.38
Maghull & Aintree	17.86
Southport	30.32
SEFTON	108.92

Several of the planning areas have seen a high reception year intake number as a percentage of births in the appropriate preceding year. This can partly be attributed to the shape of the Borough of Sefton and the extent to which many Sefton schools are located close to centres of population in neighbouring Local Authorities; Knowsley, Liverpool and West Lancashire. This has resulted in a situation whereby extra-district pupils are able to gain admission to Sefton schools on distance criteria. This is illustrated in Table 5a below.

Cross border movement of primary pupils is illustrated in Table 5a below.

**Table 5a: Cross Border movement of primary pupils**

Academic Year	Number of primary pupils residing in other local authorities attending schools in Sefton	%	Number of primary pupils residing in Sefton and attending schools in other local authorities	%
2016/17	1,144	5.5	600	3.0
2017/18	1,186	5.7	630	3.1
2018/19	1,185	5.6	719	3.5
2019/20	1,132	5.5	744	3.6
2020/21	1,100	5.2	779	3.8
2021/22	1,080	5.1	816	3.9
2022/23	1,075	5.1	830	4.0

Source: [Schools, pupils and their characteristics, Academic year 2022/23 – Explore education statistics – GOV.UK \(explore-education-statistics.service.gov.uk\)](https://explore-education-statistics.service.gov.uk)

In addition, there is a marked south-north population movement within Sefton and the movement of families impacts upon the demand for school places in both the origin and destination areas. In the southern part of the Borough pupil turnover levels are very high. In the majority of primary schools, there are approximately the same number of pupils who entered as reception pupils who are still on roll in Year 6. There are a small number of primary schools who have 30-50% more pupils in year 6 than entered as reception pupils.

Applications from non-EU countries remain high. Southport & Bootle are probably the areas which families move into the most. This could be attributed to the employment opportunities.

The projected total number of primary pupils is calculated for each year by applying cohort survival ratios to the numbers in the existing primary year groups which are moved forward and incorporating the projected number of reception pupils to be admitted in that year.

## Secondary Pupil Numbers

Forecasts of secondary pupil numbers are calculated in a comparable way to primary pupil numbers but are based upon the Year 6 cohort and the relationship between this and the intake into secondary schools.

At Authority level, the number of pupils admitted to Year 7 classes in secondary schools in September each year is slightly higher than the Year 6 cohort that left the primary sector at the end of the preceding term. However, at area level the pattern is one of contrasts, with some areas gaining large numbers of pupils whilst others lose significant numbers. Details for the cohort that transferred to the secondary phase in September 2023 are provided in Table 6.

Cross border movement of secondary pupils is illustrated in Table 5b below.

**Table 5b: Cross border movement of secondary pupils**

Academic Year	Number of secondary pupils residing in other local authorities attending schools in Sefton	%	Number of secondary pupils residing in Sefton and attending schools in other local authorities	%
2016/17	1,637	11.5	542	4.1
2017/18	1,574	11.1	635	4.8
2018/19	1,599	11.3	663	5.0
2019/20	1,604	11.9	720	5.4
2020/21	1,659	11.4	722	5.3
2021/22	1,712	11.5	709	5.1
2022/23	1,810	11.8	684	4.8

Source: [Schools, pupils and their characteristics, Academic year 2022/23 – Explore education statistics – GOV.UK \(explore-education-statistics.service.gov.uk\)](https://explore-education-statistics.service.gov.uk)

**Table 6: Changes in Pupil Numbers at Transition from Primary to Secondary Schools in 2023**

<b>Area</b>	<b>Year 7 Pupil Numbers (September 2023) as a % of Year 6 Pupil Numbers (January 2023)</b>
Bootle	83.05
Litherland	50.17
Crosby	135.28
Formby	119.49
Maghull & Aintree	129.98
Southport	95.23
SEFTON	103.71

The projected total number of secondary pupils is calculated for each year by applying cohort survival ratios to the existing secondary year groups, moving forward the numbers, and incorporating the projected numbers of Year 7 pupils. However, as surplus places increase in some schools whilst other more popular schools remain full, adjustments are made to pupil projections to reflect these emerging trends more accurately.

Pupil yield from housing developments with planning permission in Sefton's 5-year housing land supply have been included in the projections. It is difficult to predict when new housing will become available. Sefton's Planning Department have obtained information about proposed phasing from housing developers, but this can change from year to year. There are several large developments included in Sefton's Local Plan which do not fall in to the 5-year housing land supply and do not have planning permission, so they have not been included in the current projections as directed by the Department for Education. We will continue to monitor the progress on these sites.

### **Primary Pupil Numbers and Projections**

## **SEFTON'S PLANNING AREAS**

Sefton's planning areas are based on geographical and ward boundaries. Some of the planning areas were re-organised in 2017 following the closure of St Ambrose Barlow Catholic High school in August 2016. Two secondary schools in Bootle had already closed (Bootle High and St George of England High) leaving only three schools. St Wilfrid's High had closed in the Litherland secondary planning area leaving one school which was Litherland High. Because of the secondary school closures some of the feeder primary schools have been moved to other secondary schools so the Bootle and Litherland secondary planning areas have been amalgamated into one area to align them with Sefton's admission areas. To correspond with this the three former Bootle and Litherland primary planning areas (Bootle North, Bootle South and Litherland) have been amalgamated to form the "Bootle & Litherland primary planning area". There are now ten planning areas: five for primary and five for secondary as agreed with the Department for Education for the SCAP 2017 return.

**Table 13: Sefton's Primary Planning Areas**

<b>Primary Planning Area</b>	<b>Schools</b>

<b>Maghull &amp; Aintree</b>	Deyes High (Academy) Maghull High (Academy) Maricourt Catholic High
<b>Southport</b>	Birkdale High (Boys Academy) Greenbank High (Girls Academy) Meols Cop High (Academy) Stanley High (Academy) Christ the King Catholic High

Planning areas are shown on the map at Annex 1.

### **Pupil Projections by Planning Area**

The following pupil projections were submitted to the Department for Education (DFE) as part of the School Capacity (SCAP) 2023 return.

The Total Planned Admission Number (PAN) is calculated using the planned admission number for each year group in each school. This may vary from year group to year group depending on changes made in previous years. It may not always match the capacity figure for the area (based on teaching accommodation for LA maintained schools and the funding agreement for academies) as schools can choose to set a different PAN or there may be a gradual change in the PAN working through the year groups. Future changes to PANs (Published Admission Number) are included where these are known in advance.

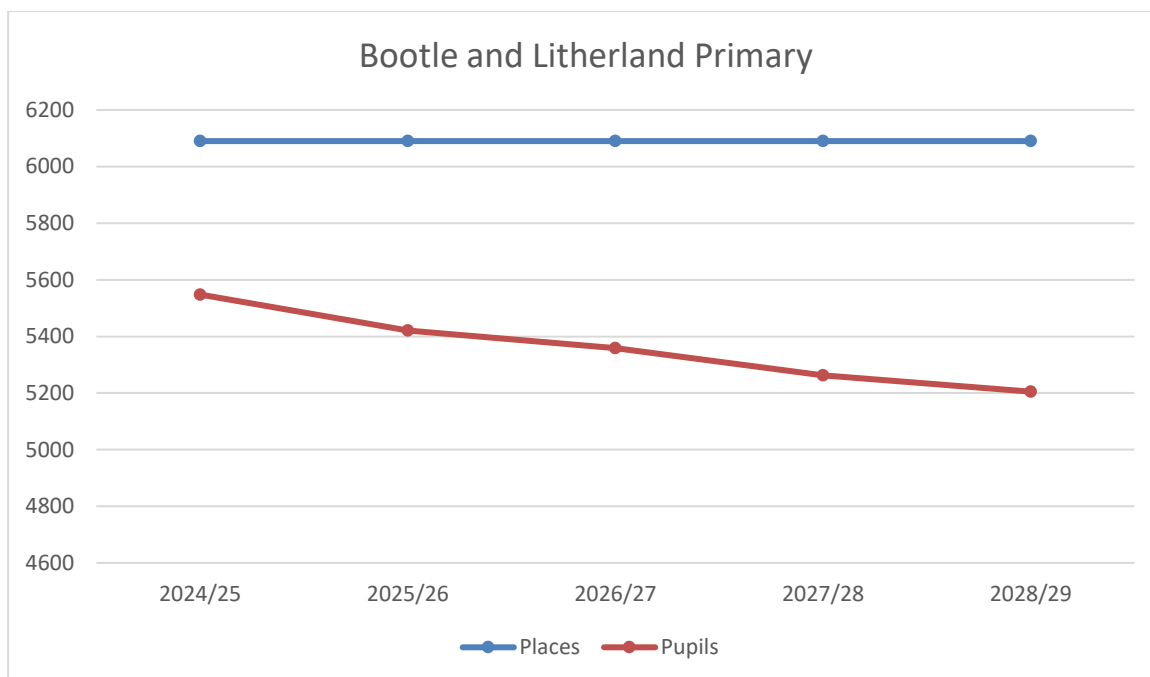

Some of the secondary academy schools in Sefton have started to cap or reduce their intake numbers in Year 8 to 11 as they are unable to admit further pupils after the entry year due to their internal school organisational arrangements. This makes planning future places difficult as the situation may change on a yearly basis. Sixth Form numbers are not included in the secondary figures as there are no planned admission numbers for Years 12 and 13.

The graphs compare the total number of pupils with the total number of places but do not show where there may be a need for additional places or too many places in a particular year group.

### **Table 15: Bootle & Litherland Primary**

Current total capacity for Reception to Y6 is 6208

Year	Total PAN	R	Y1	Y2	Y3	Y4	Y5	Y6	Total
2024/2025	6090	758	851	715	796	820	777	831	5548
2025/2026	6090	767	744	842	701	784	811	772	5421
2026/2027	6090	780	752	735	823	689	775	805	5359
2027/2028	6090	777	765	743	719	809	681	769	5263
2028/2029	6090	777	762	756	727	707	800	676	5205

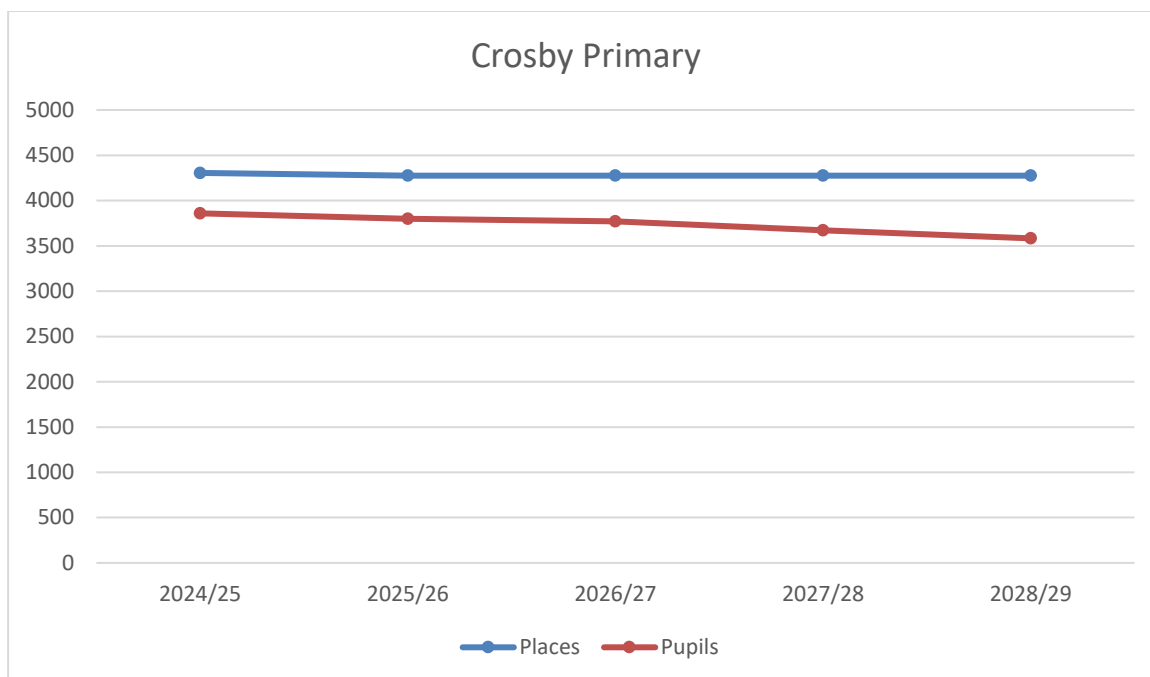

Births in Bootle have increased slightly since 2020/21, before which they had reduced in 2019/20 by 117. Births in Litherland reduced by 17% between 2019/2020 and 2020/2021 but then increased by 4.5% between 2020/21 and 2021/22. Overall intakes into Reception had dropped in 2022/22 but increased the following academic year. Reception intake for 2024 had reduced again, due to lower birth rate in Sefton (and nationally) in 2019/20. Reception numbers in the planning area look to set to increase slightly over the next couple of years.

**Table 16: Crosby Primary**

Current total capacity for Reception to Y6 is 4268

Year	Total PAN	R	Y1	Y2	Y3	Y4	Y5	Y6	Total
2024/2025	4305	476	508	545	578	612	552	588	3859
2025/2026	4275	475	489	503	559	590	619	564	3799
2026/2027	4275	478	489	485	515	572	598	634	3771
2027/2028	4275	480	492	485	497	527	579	612	3672
2028/2029	4275	479	494	488	497	508	534	593	3583

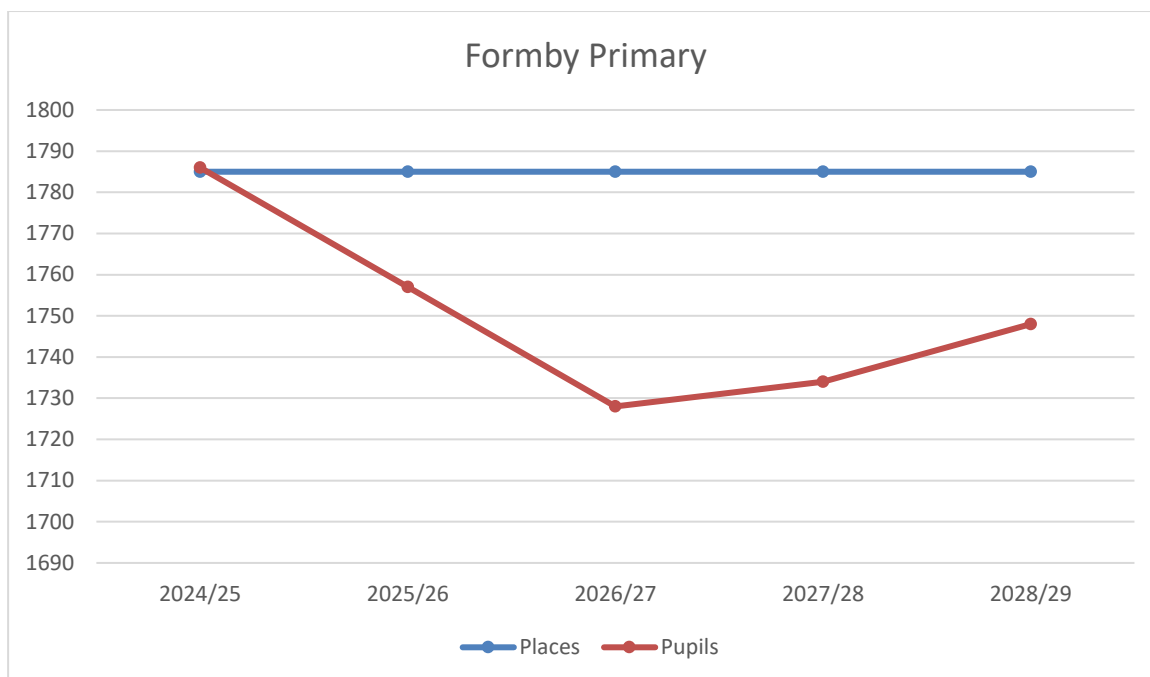

Births in the area reduced slightly in 2019/2020 but then increased again by 12% in 2020/2021. Births remained stable in 2021/22. Pupil projections indicate that pupil numbers will reduce slightly over the next few years, although we will continue to monitor new housing developments within the Thornton area.

**Table 17: Formby Primary**

Current total capacity for Reception to Y6 is 1784

Year	Total PAN	R	Y1	Y2	Y3	Y4	Y5	Y6	Total
2024/2025	1785	216	252	252	228	246	289	303	1786
2025/2026	1785	219	228	254	258	238	257	303	1757
2026/2027	1785	221	232	230	259	269	248	269	1728
2027/2028	1785	221	234	234	234	270	281	260	1734
2028/2029	1785	220	234	236	238	244	282	294	1748

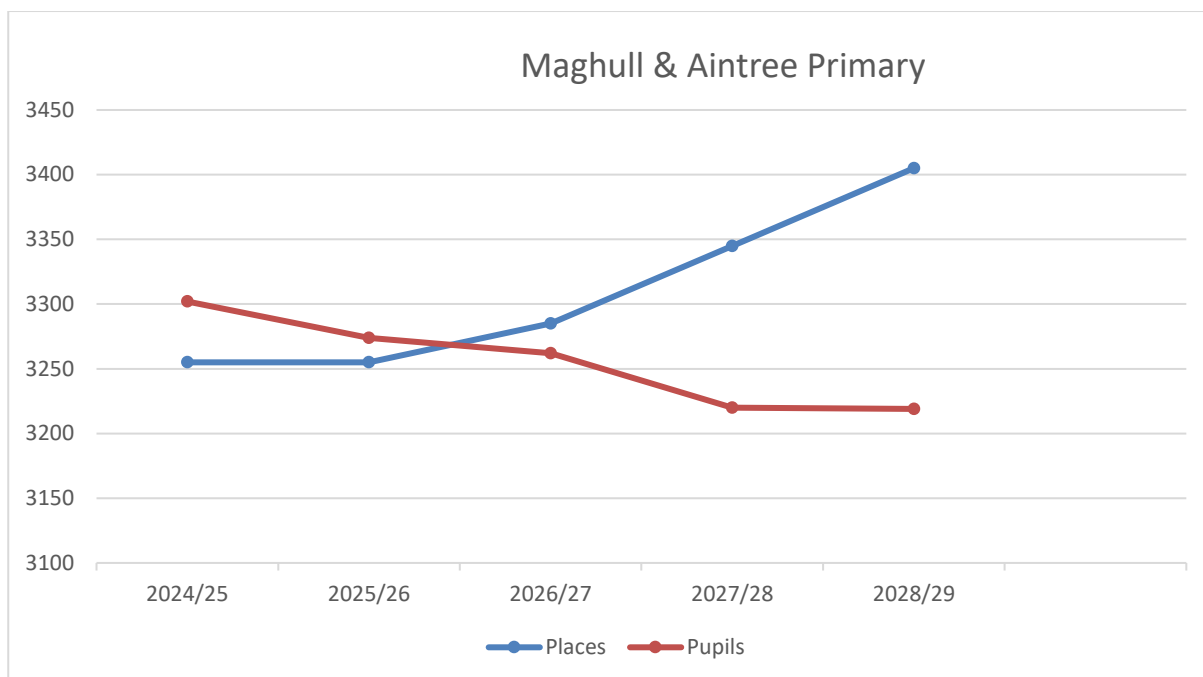

In Formby, there tends to be a shortage of places specifically in KS2 and 3 rather than overall as pupils tend to move into the area later. Births in this area reduced in 2019/20 and reduced again in 2020/21, however they increased in 2021/22 by 13.5%. Pupil projections look to reduce over the next two years but then start to increase slightly from 2026/27. It can take 2-3 years to see the full impact of a new housing estate on the demand for places at primary level.

**Table 18: Maghull & Aintree Primary**

Current total capacity for Reception to Y6 is 3680

Year	Total PAN	R	Y1	Y2	Y3	Y4	Y5	Y6	Total
2024/2025	3255	429	477	476	477	499	467	477	3302
2025/2026	3255	433	438	481	481	478	497	466	3274
2026/2027	3285	437	442	442	486	482	477	496	3262
2027/2028	3345	437	446	446	447	487	481	476	3220
2028/2029	3405	436	446	450	451	448	486	480	3219

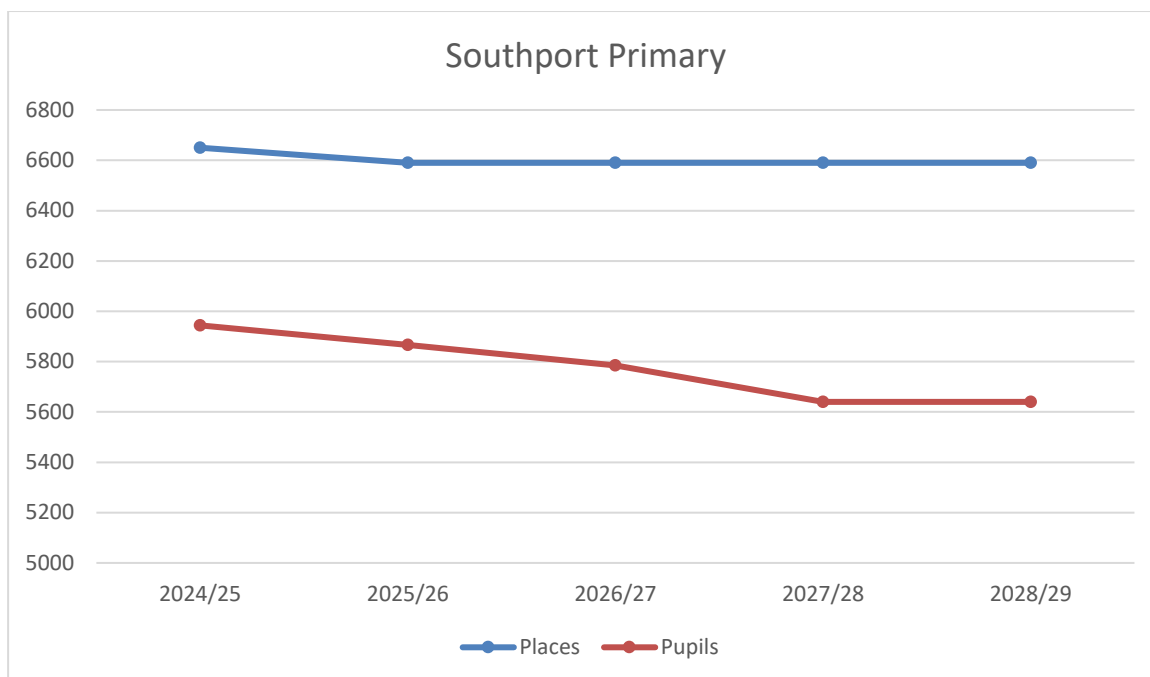

Birth rates have tended to remain stable. Intakes to Reception have also remained fairly stable over the past few years. Due to one of the schools expanding to accommodate children from the new housing developments in the area, and one of the other schools being part of the Schools Rebuild programme, we should see school places in the area start to increase from around September 2026 onwards.

Table 19: Southport Primary

Current total capacity for Reception to Y6 is 6789

Year	Total PAN	R	Y1	Y2	Y3	Y4	Y5	Y6	Total
2024/2025	6650	748	818	845	894	861	883	895	5944
2025/2026	6590	750	767	835	856	903	857	898	5866
2026/2027	6590	757	765	783	846	865	899	870	5785
2027/2028	6590	758	774	781	793	855	861	913	5640
2028/2029	6590	757	775	790	791	801	851	875	5640

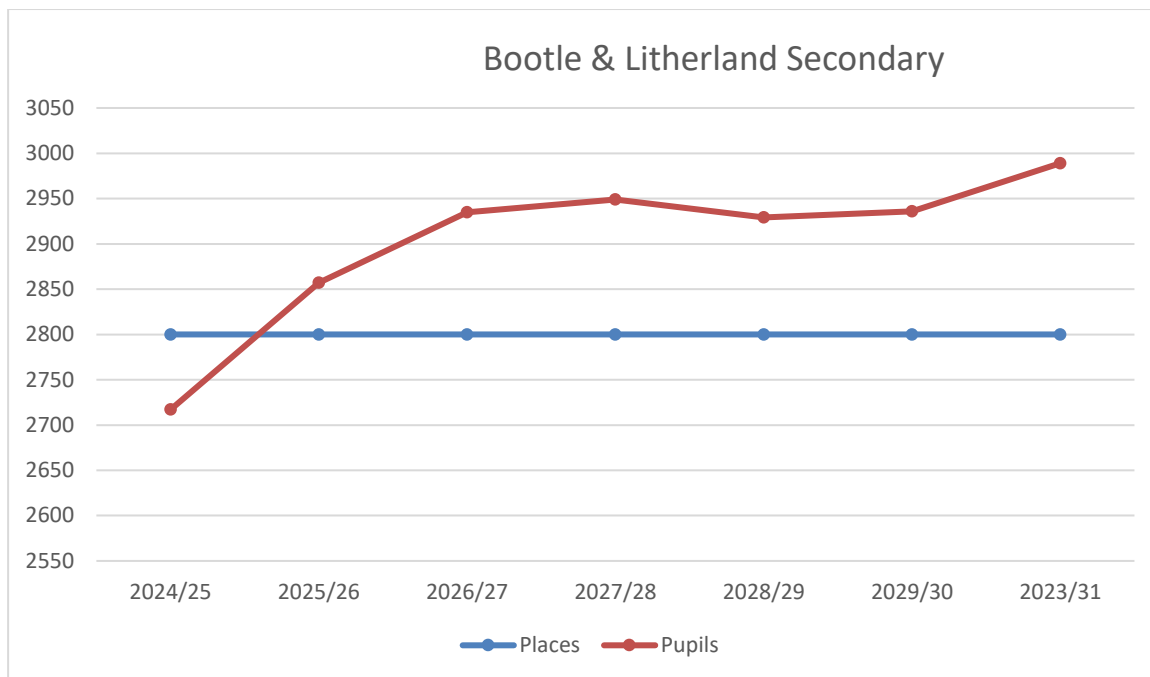

Birth rates for this area have been reducing since 2009/10. Overall intakes into Reception have fallen since 2015. This trend has resulted in a reduction in the pupil projections.

We will continue to monitor housing developments within the Southport planning area – some of which are close to the West Lancashire border.

**Table 20: Bootle & Litherland Secondary**

Current total capacity for Y7 to Y11 is 3015

Year	Total PAN	Y7	Y8	Y9	Y10	Y11	Total
2024/2025	2800	557	599	580	518	463	2717
2025/2026	2800	565	572	614	580	526	2857
2026/2027	2800	565	580	587	614	589	2935
2027/2028	2800	564	580	595	587	623	2949
2028/2029	2800	564	579	595	595	596	2929
2029/2030	2800	564	579	594	595	604	2936
2030/2031	2800	618	579	594	594	604	2989

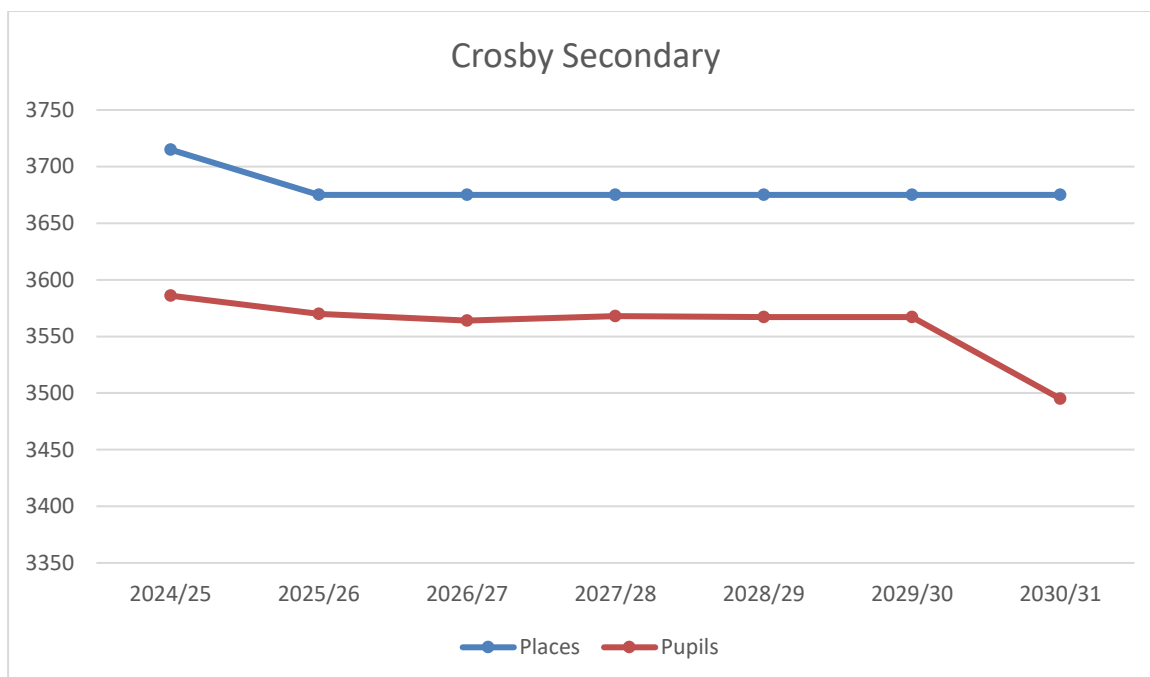

Pupil projections indicate that numbers will start to increase from 2024/2025 onwards until 2027/28 where they will plateau before increasing again from 2030. The current total capacity based on teaching accommodation and academy funding agreements is 3,015.

**Table 21: Crosby Secondary**

Current total capacity for Y7 to Y11 is 3863

Year	Total PAN	Y7	Y8	Y9	Y10	Y11	Total
2024/2025	3715	739	731	712	700	704	3586
2025/2026	3675	739	730	718	690	693	3570
2026/2027	3675	739	730	717	695	683	3564
2027/2028	3675	739	730	717	694	688	3568
2028/2029	3675	739	730	717	694	687	3567
2029/2030	3675	739	730	717	694	687	3567
2030/2031	3675	667	730	717	694	687	3495

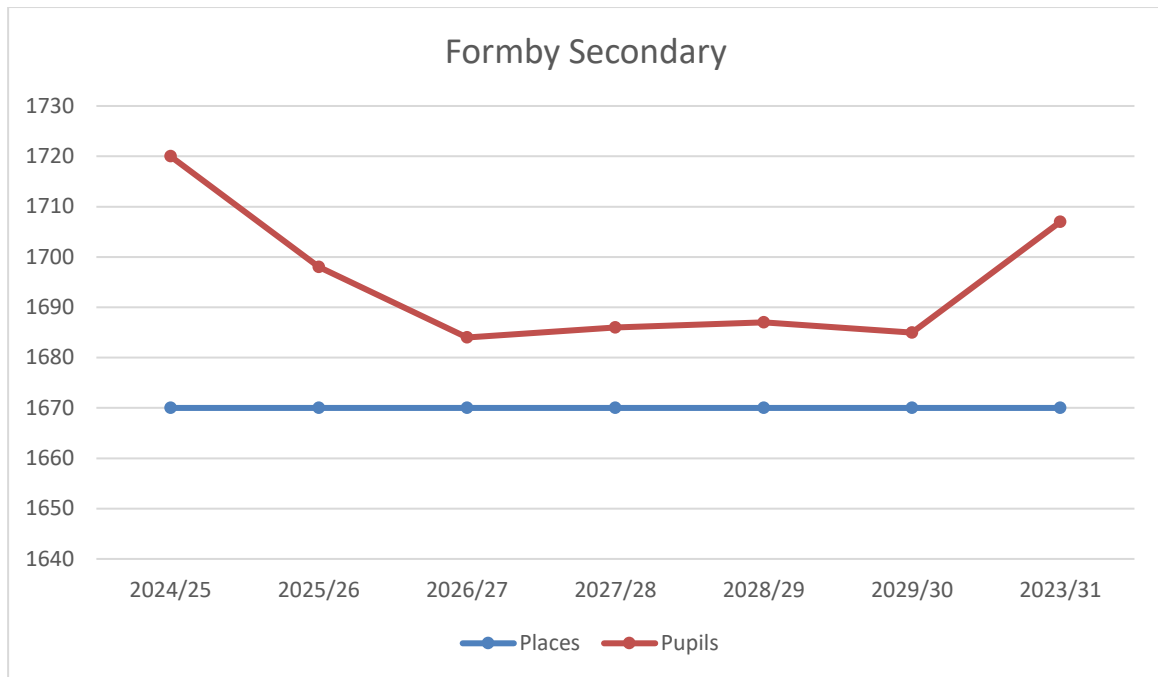

Pupil projections look to remain fairly steady over the next few years. The total capacity based on teaching accommodation and academy funding agreements is currently 3,863 for Y7 to Y11 but this is not reflected in the total places (PAN). Housing developments within the planning area will be kept under review.

**Table 22: Formby Secondary**

Current total capacity for Y7 to Y11 is 1824

Year	Total PAN	Y7	Y8	Y9	Y10	Y11	Total
2024/2025	1670	332	335	339	354	360	1720
2025/2026	1670	330	338	340	338	352	1698
2026/2027	1670	330	336	343	339	336	1684
2027/2028	1670	330	336	341	342	337	1686
2028/2029	1670	330	336	341	340	340	1687
2029/2030	1670	330	336	341	340	338	1685
2030/2031	1670	351	336	342	340	338	1707

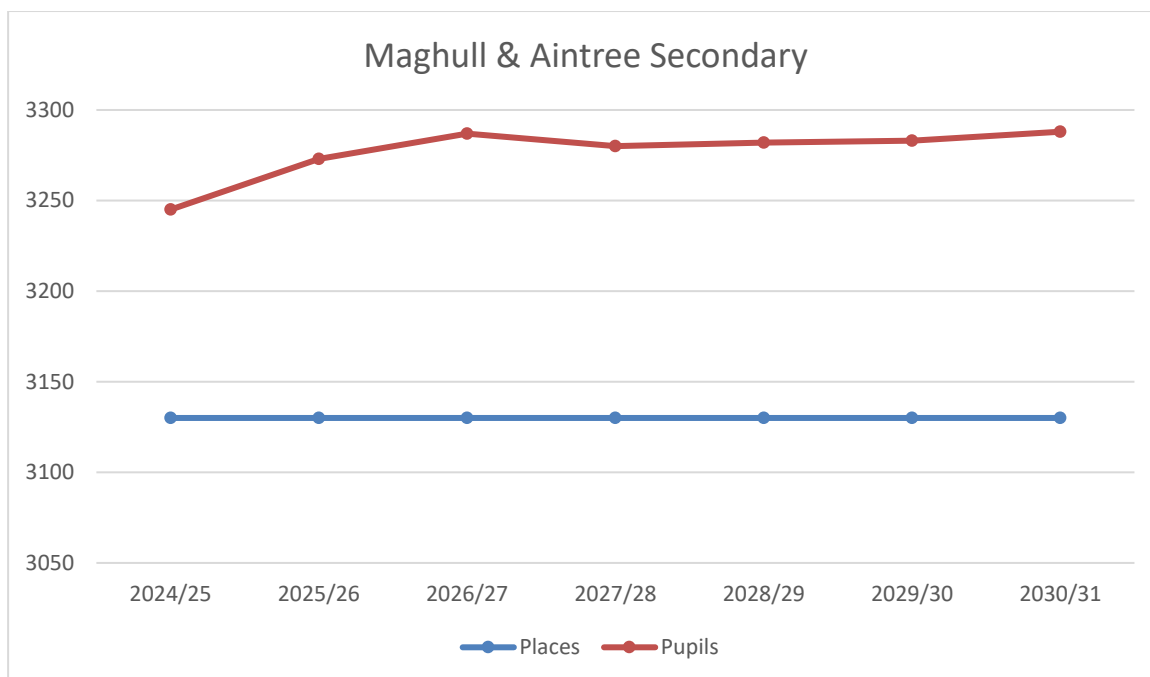

Pupil projections look to reduce over the next couple of years and then increase slightly for the following couple of years. The total capacity for Y7 to Y11 is 1824.

Table 23: Maghull & Aintree Secondary

Current total capacity for Y7 to Y11 is 3350

Year	Total PAN	Y7	Y8	Y9	Y10	Y11	Total
2024/2025	3130	662	662	662	640	619	3245
2025/2026	3130	663	663	653	661	633	3273
2026/2027	3130	663	664	654	652	654	3287
2027/2028	3130	663	664	655	653	645	3280
2028/2029	3130	663	664	655	654	646	3282
2029/2030	3130	663	664	655	654	647	3283
2030/2031	3130	668	664	655	654	647	3288

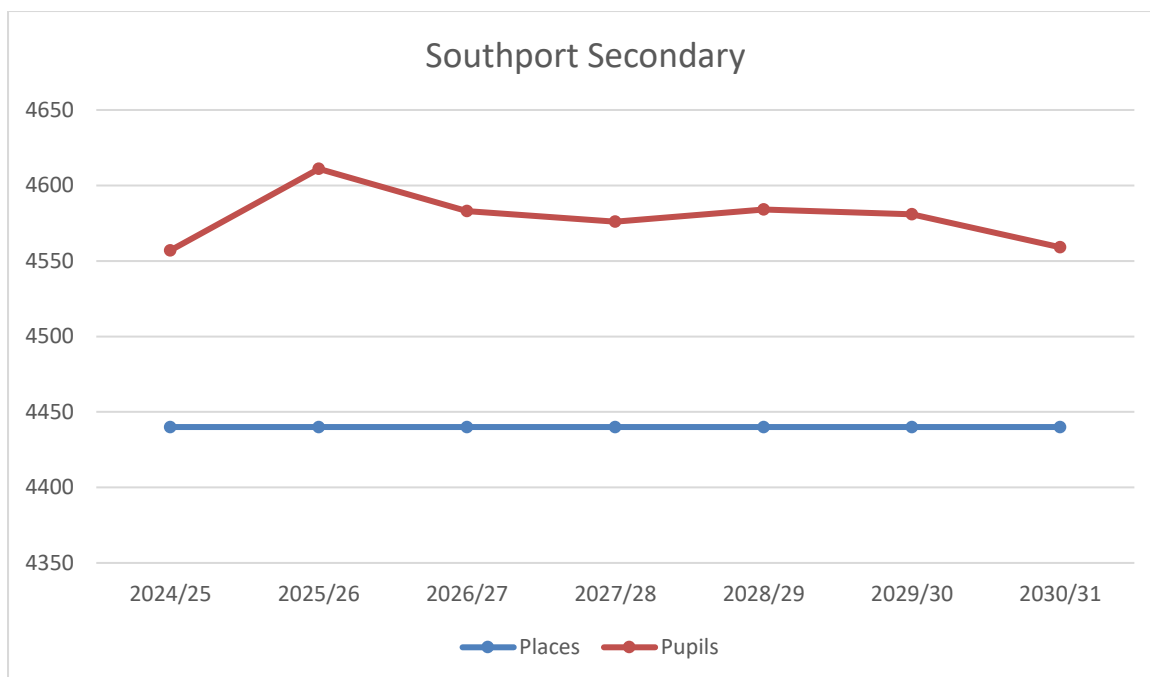

Pupil projections in this area look to increase slightly over the next two years and then remain steady for the following years. The current total capacity based on teaching accommodation and academy funding agreements for Y7 to Y11 is 3350. We continue to monitor housing developments within the area and will address any place issues.

**Table 24: Southport Secondary**

Current total capacity for Y7 to Y11 is 4594

Year	Total PAN	Y7	Y8	Y9	Y10	Y11	Total
2024/2025	4440	911	909	926	945	866	4557
2025/2026	4440	909	920	911	925	946	4611
2026/2027	4440	908	917	922	910	926	4583
2027/2028	4440	909	916	919	921	911	4576
2028/2029	4440	909	917	918	918	922	4584
2029/2030	4440	909	917	919	917	919	4581
2030/2031	4440	887	917	919	918	918	4559

The increase in pupil numbers within this area is set to continue until 2025/26, after which it looks set to drop slightly and remain fairly steady. The total capacity for Y7 to Y11 based on teaching accommodation and academy funding agreements is 4,594.

The DfE have been out / will be out in the near future to assess the net capacity of secondary schools. We are awaiting their reports following these visits.

## EMPTY PLACES & SURPLUS PLACES

### Explanatory Note

The following tables provide details of the numbers of empty places and surplus places by school and area. Surplus Places are taken from the DfE School Capacity Survey (SCAP) formerly known as the Surplus Places Return. This return uses May pupil numbers from the School Census return.

In the primary sector, the number of places is determined by multiplying each school's published admission number (PAN) by the number of year groups in the school. Where the number has changed in a particular year the original admission number still applies to the existing year groups until they have worked their way out of the school. The new number applies to all new pupils admitted after that date.

In the secondary sector, the number of places is also determined from the published admission number (PAN). The DfE has advised that where the PAN has been capped or the school has admitted over their PAN in a particular year group, we should continue to use the PAN.

The Net Capacity is a measure of the number of places available at maintained schools based upon the teaching accommodation. For academies, the capacity is based on the figure shown in their funding agreement.

The number of empty places is the difference between the number of pupils on roll and the number of school places. This can also give an indication of potential overcrowding.

The measurement of surplus places is based upon the Net Capacity which is determined by the sizes of individual teaching areas. If a school's Net Capacity exceeds the number of pupils on roll,

the numerical difference is the number of surplus places. The same is true for an academy but the capacity is based on their funding agreement. No adjustment is made to figures to take account of those schools where the number of pupils on roll exceeds the Net Capacity or funding agreement. **For individual sectors and areas, therefore, the number of surplus places is not the actual difference between the number of pupils on roll and Net Capacity.**
